

Hemofix[®]

Ferrous Ascorbate equivalent to elemental Iron 33 mg
Tablet

Description

Ferrous ascorbate, a synthetic molecule of ascorbic acid and iron.

Indications

Indicated in the treatment of iron deficiency anemia.

Dosage and Administration

Adult & Elderly: One tablet a day before or after meal (food independent absorption) or as directed by the physician. In more severe cases, two tablets a day may be required as prescribed by the physician. Safety and effectiveness in pediatric patients have not been established.

Contraindications

Hemosiderosis, hemochromatosis, hemolytic anemia.

Adverse Reactions

The treatment of a neurotic patient was interrupted because of nausea and regurgitation. In pregnant women, the incidence of pyrosis and chronic constipation is slightly increased.

Precautions

Oral iron preparations may aggravate existing peptic ulcer, regional enteritis and ulcerative colitis.

Iron compounds taken orally can impair the absorption of tetracycline antibiotics. Antacids given concomitantly with iron compounds decrease iron absorption.

Over dosage

Iron poisoning is rare in adults.

Pharmaceutical Precautions

Keep in a cool and dry place. Protect from light. Keep out of reach of children.

Commercial Pack

Hemofix[®] Tablet: Box contains 30 tablets in 3x10's alu-alu form packs. Each film coated tablet contains Ferrous Ascorbate INN equivalent to elemental Iron 33 mg.
