

Aristoplex®

Syrup

Description

Aristoplex is a liquid preparation of Vitamin B Complex.

Each 5 ml Aristoplex syrup contains :

Thiamine Hydrochloride (Vitamin B ₁)	BP	5 mg
Riboflavin (Vitamin B ₂)	USP	2 mg
Pyridoxine Hydrochloride (Vitamin B ₆)	BP	2 mg
Nicotinamide (Vitamin B ₃)	BP	20 mg

Indications

- ◆ Prevention and treatment of Vitamin B Complex deficiency states, manifested by glossitis, stomatitis, cheilosis, beriberi and polyneuritis.
- ◆ Maintenance of normal growth and health during the early days of children.
- ◆ Apathy and anorexia in elderly patients.
- ◆ Prevention of vitamin deficiencies, particularly when depletion is suspected;
 - Pregnancy and lactation
 - Convalescence during debilitating illness
 - Patients on restricted diets

Dosage and Administration

Adults and Elderly : One to two 5 ml spoonful syrup three times a day.

Children : One 5 ml spoonful syrup three times a day.

Infants : One 5 ml spoonful syrup daily.

Contraindication

Known hypersensitivity to any of the active constituents.

Precautions

Pyridoxine may reduce the therapeutic efficacy of Levodopa.

Use in Special Population

Pregnancy and lactation : As with all medicines, careful considerations should be given before the administration of B complex preparations during the first trimester of pregnancy. Vitamins are excreted in breast milk.

Commercial Pack
