

Iron, Vitamin B complex, Vitamin C, Folic Acid and Zinc
Capsule

Description

Omnivit[®] is a special preparation of Iron, Folic Acid, Vitamin B complex, Vitamin C and Zinc. Iron is presented in timed release form to escape gastric irritation.

Indications

Omnivit[®] is indicated for the treatment and prophylaxis of iron, folic acid, vitamin B complex and vitamin C deficiency or to meet extra need of these vitamins and minerals specially in pregnancy or when planning for pregnancy.

Dosage and Administration

Adult: One capsule daily. In severe deficiency states, two capsules a day may be required or as directed by the physician.

Contraindications

Omnivit[®] is contraindicated in patients with a known hypersensitivity to any of the ingredients. Iron therapy is contraindicated in hemochromatosis and hemosiderosis, and in patients receiving repeated blood transfusion or with anemia not produced by iron deficiency.

Side Effects

Generally well tolerated. However, a few gastrointestinal disorders and allergic reactions may be seen.

Drug Interactions

No such drug interactions have been reported.

Precaution

Care should be taken when given to patients with iron storage or iron absorption disease. Iron form chelates with Antacids and Tetracycline and absorption of all these may be impaired if taken

concurrently.

Omnivit[®] should be given cautiously to patients taking Levodopa as one of the ingredients of this preparation, Pyridoxine reduces the effect of Levodopa.

Use in Pregnancy & Lactation

Safety is well established and is recommended during pregnancy & lactation.

Pharmaceutical Precaution

Store in a cool and dry place, protect from light. Keep out of the reach of children.
