

Spanil®

Tablet

Description

Spanil is an antispasmodic containing Hyoscine Butylbromide BP in each tablet. Hyoscine Butylbromide is a competitive antagonist of acetylcholine at post-ganglionic parasympathetic nerve endings. It relaxes smooth muscles of the hollow organs of the abdominal and pelvic cavities.

Indications

It is indicated for the following conditions :

- ◆ Spasm of the gastrointestinal tract
- ◆ Spasm of the genito-urinary tract
- ◆ Spasmodic dysmenorrhoea

Dosage and Administration

Adult : 1-2 tablets 3-4 times daily

Children (6-12 years) : 1 tablet 3 times daily

Contraindication

Spanil should not be given to patients suffering from glaucoma.

Precautions

Should be used with caution during 1st trimester of pregnancy.

Side Effects

Dryness of mouth and tachycardia have been reported infrequently during treatment with Hyoscine Butylbromide.

Commercial Pack

Spanil® Tablet : Box containing 10 blister strips of 10 film coated tablets, each tablet contains 10 mg of Hyoscine Butylbromide BP.
